And of course, being an inhabitant of this city also brings with it the chance to experience all the privileges offered by one of the leading centres of the world. One of the management centres of the business world both of Turkey and of the world, Istanbul naturally has a future investment at every point.

Airport 24 is a world of investment, the value of which will always increase due to

- being at a point where the main arteries of the city intersect
- having a different architectural feature, rising in one of the districts where urban transformation is best planned
